SUMMARY

Overall Condition: FAIR
Overall Comments: Machine has been road side mulcher its hole life. -Machine is clean but, scratches and dents at the bottom of the stick aswell as bent step on the upper section of the machine. bucket cylinder has some rust spots on barrel and huge dent on drivers side near counter weight, counter weight itself is scratched like crazy and gouged hard. handles up top are covered in a bunch of surface rust and have terrible weld repairs in places. -machine monitor works as well as all other functions like menu, a/c, heat rabbit or slow, radio, rev switch, etc. the only thing that doesn't work is the windshield wiper and the mulcher monitor wont boot up. -cooling system seems to work and keep the engine at operating temperature and heat and a/c work aswell. - Engine is burning oil and there is a ton of blow bye causing the machine to smoke bad from the engine. oil dipstick is missing (it was checked using another doner dip stick and has oil. there's also quite a bad oil leak from the whole bottom o
Evaluator's Name: Jeramie Downey813
Operated Machine: Yes
Hours: 14,010
